How Flowers Reproduce – A Storyboard Assignment

Assignment: Create an eight section storyboard describing pollination and fertilization in a flowering plant. Each box is to have a caption (complete sentence) and an illustration. Use the box guides and illustrations below to help you plan your board

Box 1. A title and introductory picture about your storyboard.

Box 2. Where does pollen form?

Box 3. What is pollination?

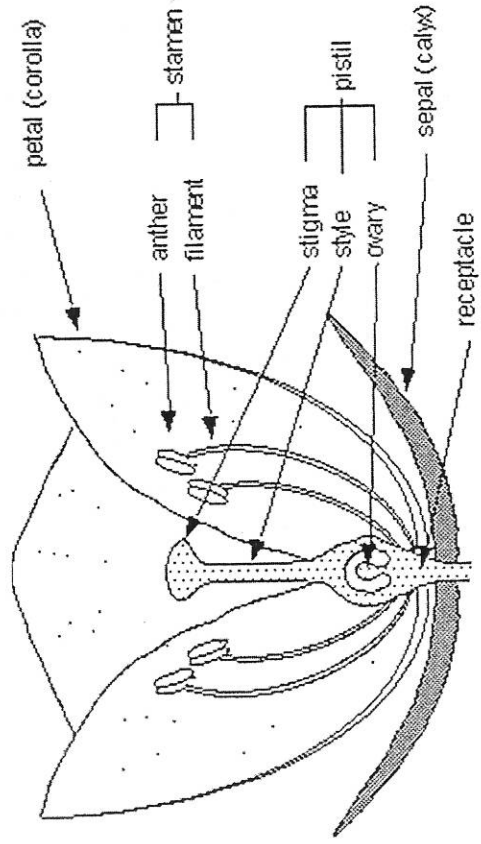

Box 4. What begins to form after pollination occurs?

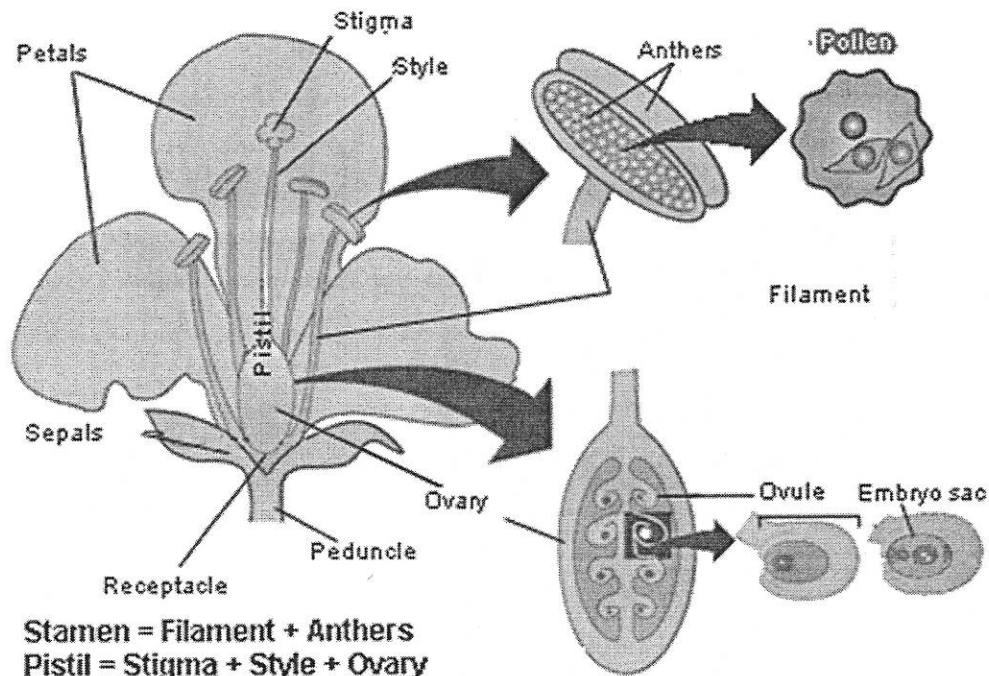

Box 5. Once the pollen tube is finished, what travels down the tube?

Box 6. What happens in fertilization?

Box 7. What happens to the fertilized egg?

Box 8. What happens to the ovary after fertilization?

Stamen = Filament + Anthers
Pistil = Stigma + Style + Ovary
Perianth = Sepals + Petals
